6. Potential Incidents

S.N	Ticket No	Severity	Incident Title	Observation & Recommendation	Status	True/False Positive
1	#75298	medium	Office365: Brute Force Login Attempts - Same User	**Observation:** Multiple failed login attempts were detected for the same Office 365 user account, indicating a potential brute force attack. **Remediation:** Reset the user's password, enable/verify Multi-Factor Authentication (MFA), and review sign-in logs to block suspicious IP addresses.	Open	True Positive
2	#75306	medium	Office365: Brute Force Login Attempts - Same User	**Observation:** Multiple failed login attempts were detected for the same Office 365 user account, indicating a potential brute force attack. **Remediation:** Reset the user's password, enable/verify Multi-Factor Authentication (MFA), and review sign-in logs to block suspicious IP addresses.	Close	False Positive
3	#75303	medium	Office365: Mailbox SendAs or SendOnBehalf has occurred	**Observation:** A SendAs or SendOnBehalf action was detected in an Office 365 mailbox, indicating that an email was sent using another user's mailbox permissions. **Remediation:** Verify whether the permission is authorized, review mailbox delegation settings, and remove or restrict unauthorized SendAs/SendOnBehalf access.	Close	False Positive

6. Potential Incidents (Continued)

S.N	Ticket No	Severity	Incident Title	Observation & Recommendation	Status	True/False Positive
4	#75313	medium	Safetica DLP Sensitive Data Activity	Observation: Safetica DLP detected activity involving sensitive data, indicating a potential attempt to access, transfer, or handle protected information. Remediation: Review the user activity and data involved, block or restrict unauthorized data transfers, and enforce DLP policies to prevent further exposure.	Open	True Positive

NOTE: We have shared the remediation details with the customer, and the action is currently pending on their side.
