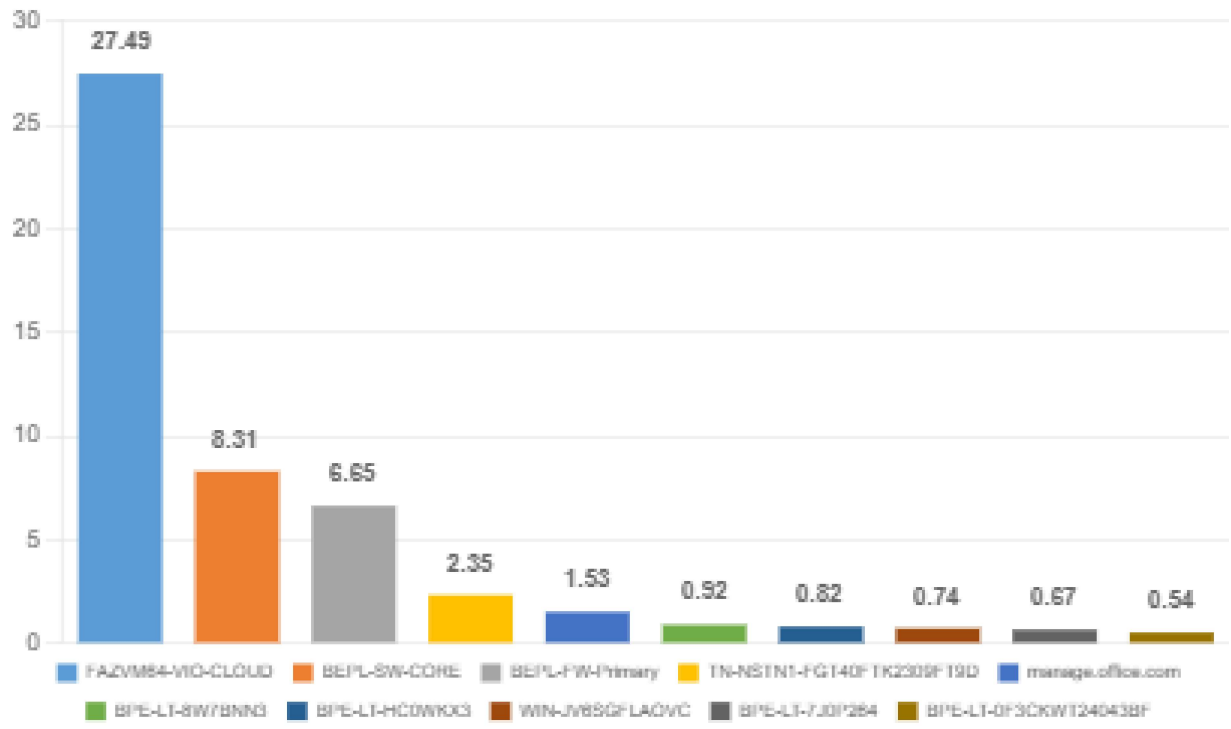
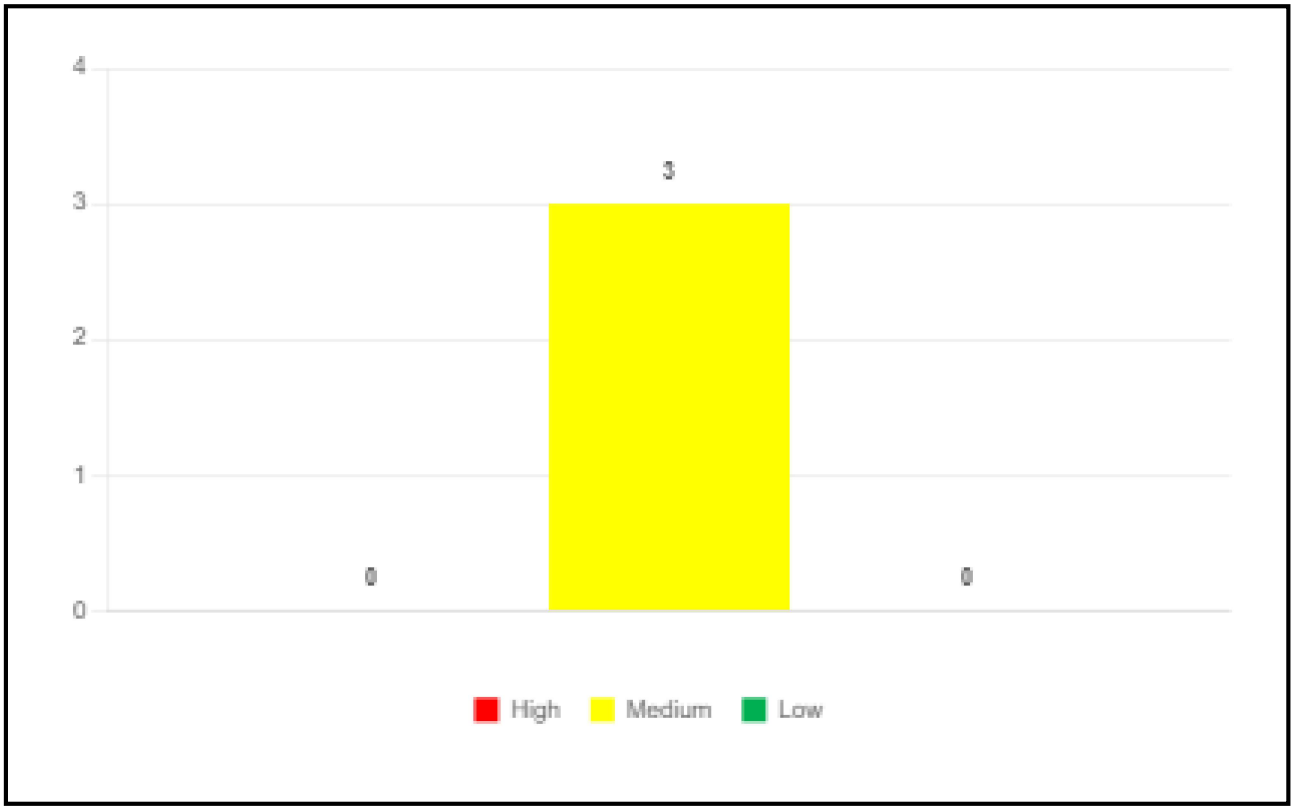
AVG EPS	190

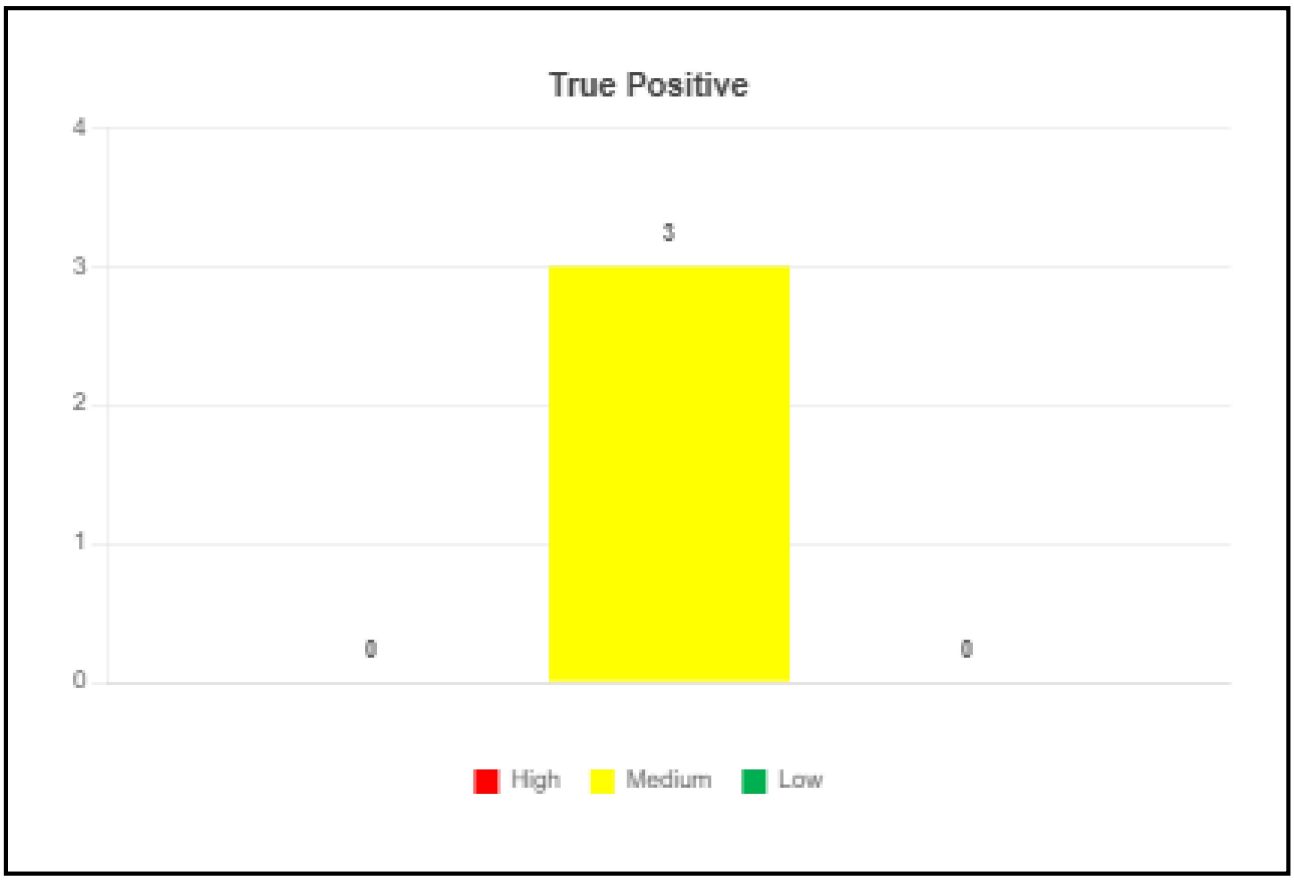
2. Reporting Device - Average EPS



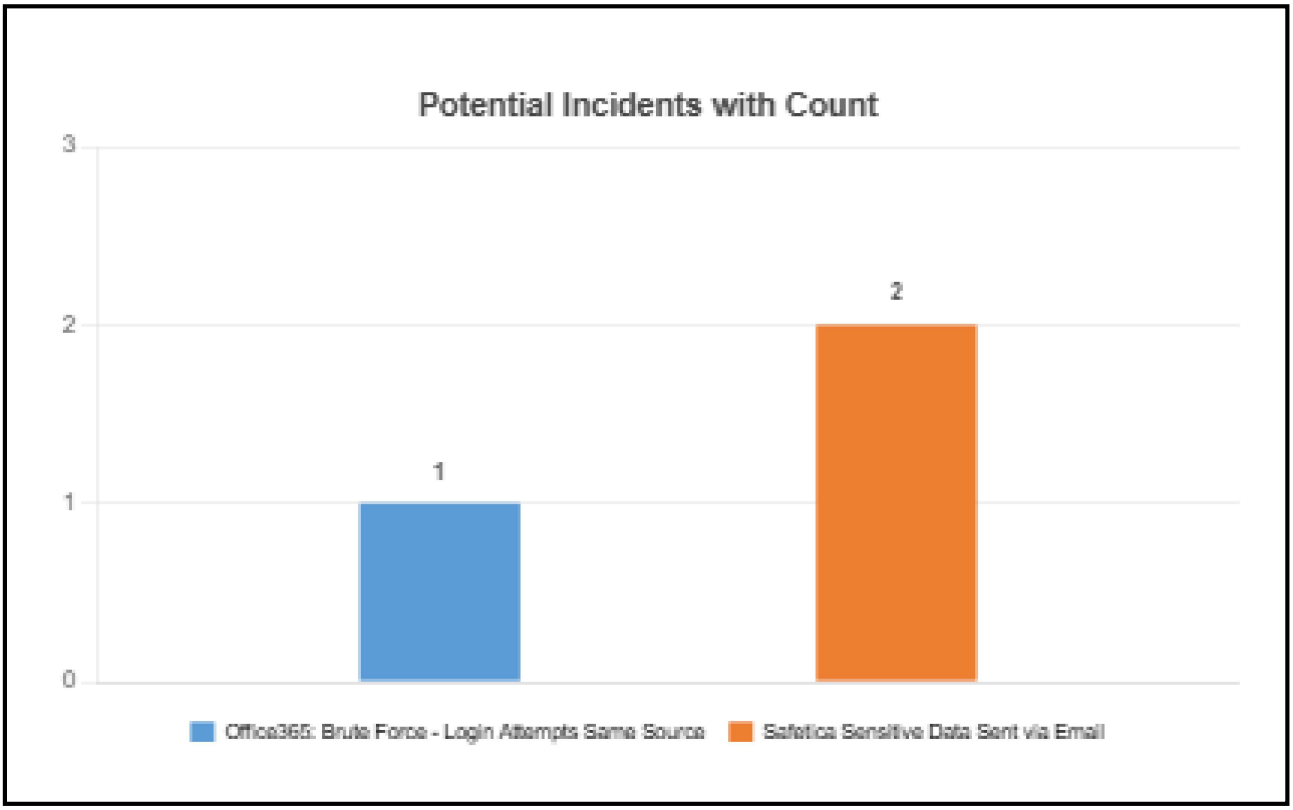
3. Incident Count based on Severity



4. False Positive & True Positive



5. Potential Incidents with Count



6. Potential Incidents

S.N	Ticket No	Severity	Incident Title	Observation & Recommendation	Status	True/False Positive
1	#75509	Medium	Office365: Brute Force - Login Attempts Same Source	**Observation:** Multiple failed login attempts were detected from the same source targeting Microsoft 365 accounts, indicating a potential brute force attack. **Remediation:** Enable account lockout policies and multi-factor authentication (MFA), and block or investigate the suspicious source IP attempting repeated logins.	Open	True Positive

6. Potential Incidents (Continued)

S.N	Ticket No	Severity	Incident Title	Observation & Recommendation	Status	True/False Positive
2	#75533	Medium	Safetica Sensitive Data Sent via Email	**Observation:** Sensitive data was detected being sent via email by a user, as identified by Safetica, indicating a potential data leakage risk. **Remediation:** Review the email activity, enforce DLP policies to restrict sharing of sensitive data, and provide user awareness on proper data handling practices.	Open	True Positive
3	#75534	Medium	Safetica Sensitive Data Sent via Email	**Observation:** Sensitive data was detected being sent via email by a user, as identified by Safetica, indicating a potential data leakage risk. **Remediation:** Review the email activity, enforce DLP policies to restrict sharing of sensitive data, and provide user awareness on proper data handling practices.	Open	True Positive

NOTE : We have shared the remediation details with the customer, and the action is currently pending on their side.
