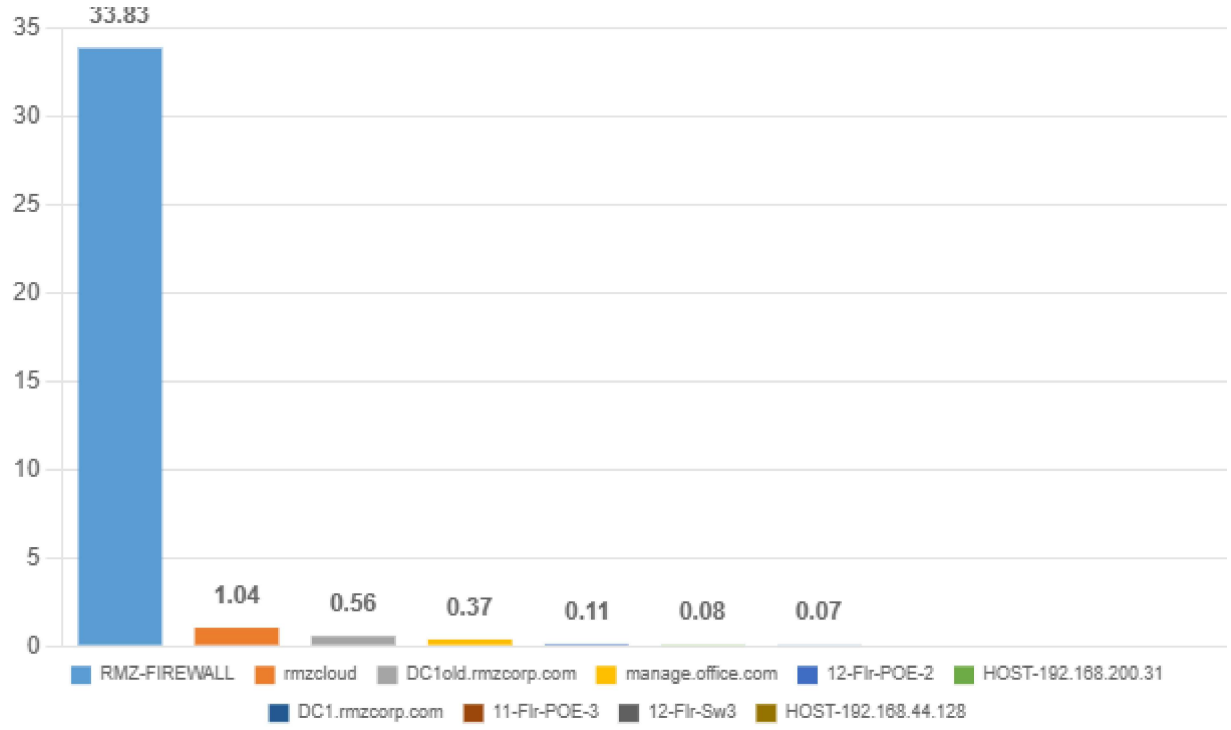
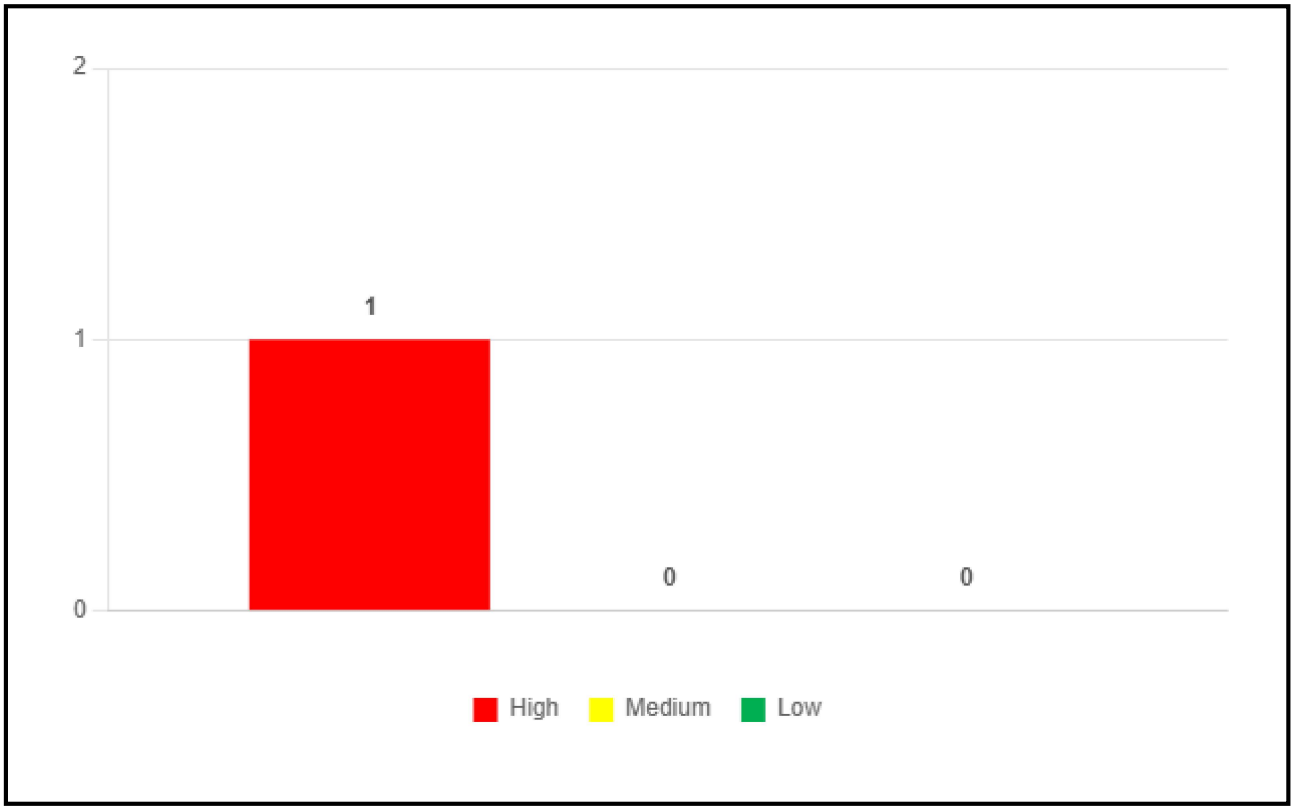
AVG EPS	40

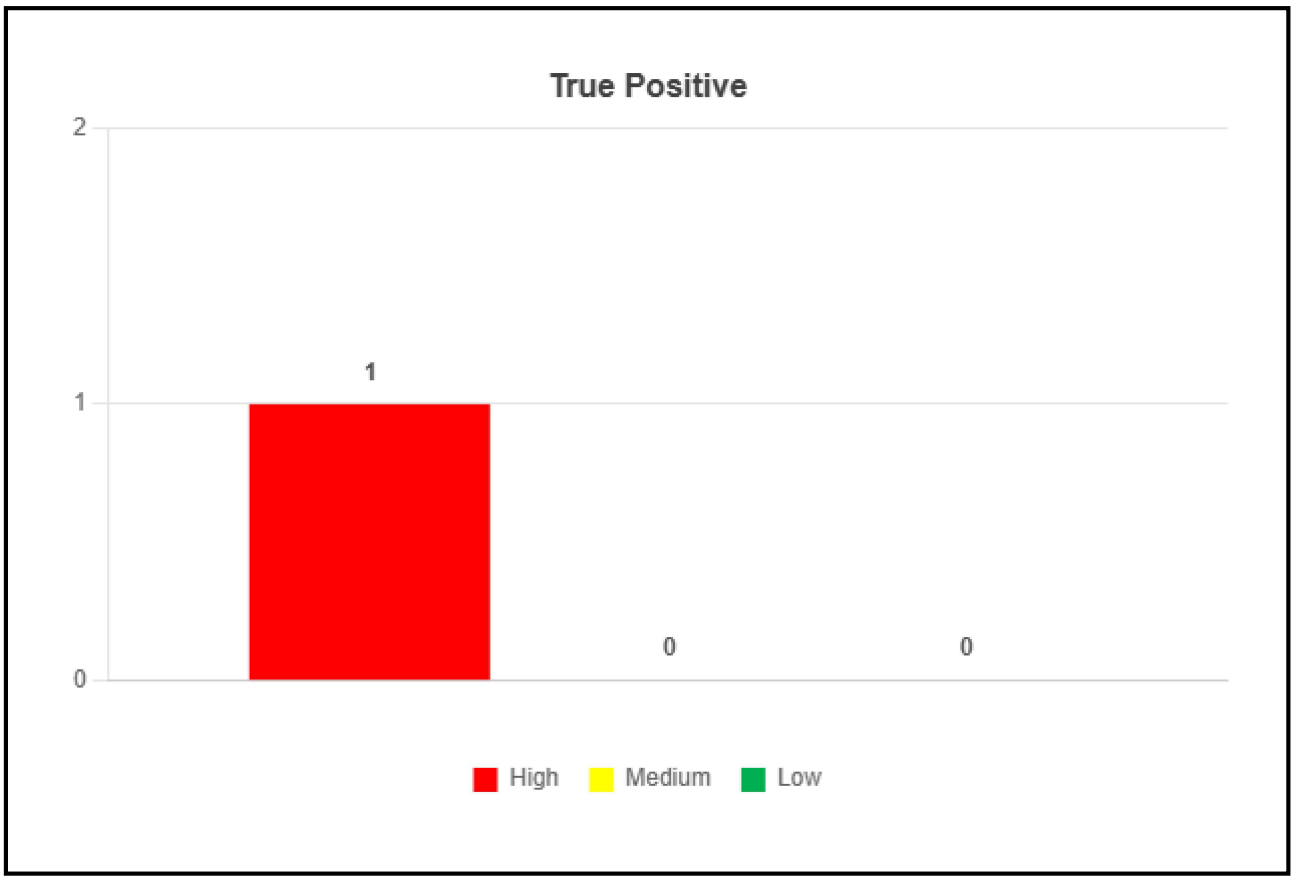
2. Reporting Device - Average EPS



3. Incident Count based on Severity



4. False Positive & True Positive



5. Potential Incidents

S.N	Ticket No	Severity	Incident Title	Observation & Recommendation	Status	True/False Positive
1	#75481	High	Sudden-User Location Change	**Observation:** A user login was detected from a geographically distant location within a short time compared to the user's normal login pattern, indicating a potential impossible travel or suspicious access. **Remediation:** Verify the activity with the user, enforce MFA or password reset if needed, and review authentication logs while blocking or monitoring the suspicious IP.	Open	True Positive

NOTE: We have shared the remediation details with the customer, and the action is currently pending on their side.
