5. Potential Incidents

S.N	Ticket No	Severity	Incident Title	Observation & Recommendation	Status	True/False Positive
1	#75541	Medium	End User - DNS Queries to Unauthorized DNS Servers	**Observation:** End-user systems are sending DNS queries to unauthorized external DNS servers instead of the approved internal DNS servers. **Remediation:** Restrict DNS traffic so endpoints can only query authorized internal DNS servers using firewall rules and endpoint policies.	Open	True Positive

NOTE : We have shared the remediation details with the customer, and the action is currently pending on their side.
